AI RECOMMENDATION

Model performing well. Continue monitoring.

Dashboard Evolution in Progress

Advanced visualization tiles coming soon to enhance your fraud detection capabilities

Network Graph Analysis

Visualize fraud rings and connected accounts to identify complex money laundering patterns

Geo Hotspot Mapping

Interactive maps showing fraud concentration areas and impossible travel patterns

Temporal Pattern Recognition

Time-series analysis to detect seasonal fraud trends and attack waves

Risk Score Matrix

Multi-dimensional risk assessment combining behavioral and transactional signals

Behavioral Clustering

ML-powered user segmentation to identify anomalous behavior patterns

Transaction Flow Visualization

Sankey diagrams showing money movement and fund redistribution patterns

● ● ● 15+ Advanced Analytics Tiles in Active Development

Building enterprise-grade fraud detection visualizations powered by AI/ML algorithms and real-time data processing
